General Purpose White
Portfolio

*High flux
and color stability*

Technical Datasheet DS64

LUXEON
NEVER BEFORE POSSIBLE

LUXEON® Rebel

General Purpose White Portfolio

Introduction

The LUXEON® Rebel General Purpose White Portfolio LEDs in this datasheet are ideal for all lighting and illumination applications. These flux differentiated parts, like all other LUXEON Rebel LEDs, provide the industry's best lumen maintenance, superior reliability and quality white light that make them the most widely used power LEDs today. Using the information in this document you can start designing applications to your unique specifications.

LUXEON Rebel General Purpose White LEDs

- Deliver more usable light and higher flux density
- Optimize applications to reduce size and cost
- Tightly pack the LEDs for mixing
- Engineer more robust applications
- Utilize standard FR4 PCB technology
- Simplify manufacturing through the use of surface mount technology
- Recognized under the Component Recognition Program of Underwriters Laboratories Inc. UL listing E327436.

General Product Information

Product Nomenclature

LUXEON Rebel is tested and binned at 350 mA, with current pulse duration of 20 ms. All characteristic charts where the thermal pad is kept at constant temperature (25°C typically) are measured with current pulse duration of 20 ms. Under these conditions, junction temperature and thermal pad temperature are the same.

The part number designation is explained as follows:

L X M L - A B C D - E F G H

Where:

- A — designates radiation pattern (value P for Lambertian)
- B — designates color (W = White)
- C — designates tint variant (C = Cool-White or N = Neutral-White)
- D — designates test current (value I for 350 mA)
- E — reserved for future product offerings
- FGH — minimum luminous flux (lm)

Therefore products tested and binned at 350 mA follow the part numbering scheme:

L X M L - P W x I - 0 x x x

Average Lumen Maintenance Characteristics

Lumen maintenance for solid-state lighting devices (LEDs) is typically defined in terms of the percentage of initial light output remaining after a specified period of time. Philips Lumileds projects that LUXEON Rebel products will deliver, on average, 70% lumen maintenance (L70) at 50,000 hours of operation at a forward current of up to 700 mA. This projection is based on constant current operation with junction temperature maintained at or below 135°C. This performance is based on independent test data, Philips Lumileds historical data from tests run on similar material systems, and internal LUXEON reliability testing. Observation of design limits included in this data sheet is required in order to achieve this projected lumen maintenance.

Environmental Compliance

Philips Lumileds is committed to providing environmentally friendly products to the solid-state lighting market. LUXEON Rebel is compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the REACH and RoHS directives. Philips Lumileds will not intentionally add the following restricted materials to the LUXEON Rebel: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).

Luminous Flux Characteristics

Luminous Flux Characteristics for LUXEON Rebel, Thermal Pad Temperature=25°C

Table 1.

Performance at Test Current				Typical Performance at Indicated Current	
Color	Part Number	Minimum Luminous Flux (lm) $\Phi_v^{[1]}$	Test Current (mA)	Typical Luminous Flux (lm) $\Phi_v^{[2]}$	Drive Current (mA)
Cool White	LXML-PWCI-0090	90	350	160	700
	LXML-PWCI-0100	100	350	180	700
	LXML-PWCI-0110	110	350	200	700
	LXML-PWCI-0120	120	350	220	700
Neutral-White	LXML-PWNI-0090	90	350	160	700
	LXML-PWNI-0100	100	350	180	700
	LXML-PWNI-0110	110	350	200	700
	LXML-PWNI-0120	120	350	220	700

Notes for Table 1:

1. Minimum luminous flux performance guaranteed within published operating conditions. Philips Lumileds maintains a tolerance of $\pm 6.5\%$ on flux measurements.
2. Typical luminous flux performance when device is operated within published operating conditions.

Flux Performance, Binning, and Supportability

LEDs are produced with semiconductor technology that is subject to process variation, yielding a range of flux performance that is approximately Gaussian in nature. In order to provide customers with fine granularity within the overall flux distribution, Philips Lumileds separates LEDs into fixed, easy to design with, minimum luminous flux bins. To verify supportability of parts chosen for your application design, please consult your Philips Lumileds or Future Lighting Solutions sales representative.

Optical Characteristics

Lambertian LUXEON Rebel at Test Current ^[1]

Thermal Pad Temperature = 25°C

Table 2.

Color ^{[6], [7]}	Color Temperature ^{[2], [3]} CCT			Typical Total Included Angle ^[5] (degrees) $\theta_{0.90V}$ ^[4]	Typical Viewing Angle ^[6] (degrees) $2\theta_{1/2}$
	Min.	Typ.	Max.		
Cool-White	4500K	6500K	10,000K	160	120
Neutral-White	3500K	4100K	4500K	160	120

Notes for Table 2:

1. Test current is 350 mA for all LXML-PWxI-0xxx products.
2. CCT $\pm 5\%$ tester tolerance.
3. Typical CRI (Color Rendering Index) for cool-white and neutral-white is 70.
4. Total angle at which 90% of total luminous flux is captured.
5. Viewing angle is the off axis angle from lamp centerline where the luminous intensity is $\frac{1}{2}$ of the peak value.
6. All white products are built with Indium Gallium Nitride (InGaN).
7. Cool-white and neutral-white power light sources represented here are IEC825 class 2 for eye safety.

Electrical Characteristics

Electrical Characteristics at 350 mA for LUXEON Rebel, Part Numbers LXML-PWxI-0xxx, Thermal Pad Temperature = 25°C

Table 3.

Color	Forward Voltage V_f ^[1] (V)			Typical Temperature Coefficient of Forward Voltage ^[2] (mV/°C) $\Delta V_f / \Delta T_j$	Typical Thermal Resistance Junction to Thermal Pad (°C/W) $R\theta_{j-c}$
	Min.	Typ.	Max.		
Cool-White	2.55	3.00	3.99	-2.0 to -4.0	10
Neutral-White	2.55	3.00	3.99	-2.0 to -4.0	10

Notes for Table 3:

1. Philips Lumileds maintains a tolerance of $\pm 0.06V$ on forward voltage measurements.
2. Measured between 25°C = T_j = 110°C at I_f = 350 mA.

Typical Electrical Characteristics at 700 mA for LUXEON Rebel, Part Numbers LXML-PWxI-0xxx, Thermal Pad Temperature = 25°C ^[2]

Table 4.

Color	Typical Forward Voltage V_f ^[1] (V)
Cool-White	3.20
Neutral-White	3.20

Notes for Table 4:

1. Philips Lumileds maintains a tolerance of $\pm 0.06V$ on forward voltage measurements.
2. Measured between 25°C = T_j = 110°C at I_f = 700 mA.

Absolute Maximum Ratings

Table 5.

Parameter	Cool-White/Neutral-White
DC Forward Current (mA)	1000
Peak Pulsed Forward Current (mA)	1000
Average Forward Current (mA)	1000
ESD Sensitivity	< 8000V Human Body Model (HBM) Class 2 JESD22-A114-B < 400V Machine Model (MM) Class 2 JESD22-A115-B
LED Junction Temperature ^[1]	150°C
Operating Case Temperature at 350 mA	-40°C - 135°C
Storage Temperature	-40°C - 135°C
Soldering Temperature	JEDEC 020c 260°C
Allowable Reflow Cycles	3
Autoclave Conditions	121°C at 2 ATM 100% Relative Humidity for 96 Hours Maximum
Reverse Voltage (Vr)	See Note 2

Notes for Table 5:

1. Proper current derating must be observed to maintain junction temperature below the maximum.
2. LUXEON Rebel LEDs are not designed to be driven in reverse bias.

JEDEC Moisture Sensitivity

Table 6.

			Soak Requirements	
Level	Floor Life		Standard	
	Time	Conditions	Time	Conditions
1	unlimited	≤ 30°C / 85% RH	168h + 5 / -0	85°C / 85% RH

Reflow Soldering Characteristics

Table 7.

Profile Feature	Lead Free Assembly
Average Ramp-Up Rate ($T_{s_{max}}$ to T_p)	3°C / second max
Preheat Temperature Min ($T_{s_{min}}$)	150°C
Preheat Temperature Max ($T_{s_{max}}$)	200°C
Preheat Time ($t_{s_{min}}$ to $t_{s_{max}}$)	60 - 180 seconds
Temperature (T_L)	217°C
Time Maintained Above Temperature T_L (t_L)	60 - 150 seconds
Peak / Classification Temperature (T_p)	260°C
Time Within 5°C of Actual Peak Temperature (t_p)	20 - 40 seconds
Ramp - Down Rate	6°C / second max
Time 25°C to Peak Temperature	8 minutes max

Notes for Table 7:

- All temperatures refer to the application Printed Circuit Board (PCB), measured on the surface adjacent to the package body.

Mechanical Dimensions

Figure 1. Package outline drawing.

Notes for Figure 1:

- Do not handle the device by the lens—care must be taken to avoid damage to the lens or the interior of the device that can be damaged by excessive force to the lens.
- Drawings not to scale.
- All dimensions are in millimeters.
- The Thermal Pad is electrically isolated from the Anode and Cathode contact pads.

Pad Configuration

Figure 2. Pad configuration.

Note for Figure 2:

- The Thermal Pad is electrically isolated from the Anode and Cathode contact pads.

Solder Pad Design

Figure 3. Solder pad layout.

Note for Figure 3:

- The photograph below shows the recommended LUXEON Rebel layout on Printed Circuit Board (PCB). This design easily achieves a thermal resistance of 7K/W.
- Application Brief AB32 provides extensive details for this layout. In addition, the .dwg files are available at www.philipslumileds.com and www.philipslumileds.cn.com.

Product Binning and Labeling

Purpose of Product Binning

In the manufacturing of semiconductor products, there is a variation of performance around the average values given in the technical data sheets. For this reason, Philips Lumileds bins the LED components for luminous flux, color and forward voltage (V_f).

Decoding Product Bin Labeling

LUXEON Rebel emitters are labeled using a three or four digit alphanumeric code (CAT code) depicting the bin values for emitters packaged on a single reel. All emitters packaged within a reel are of the same 3-variable bin combination. Using these codes, it is possible to determine optimum mixing and matching of products for consistency in a given application.

Reels of Cool-White and Neutral-White emitters are labeled with a four digit alphanumeric CAT code following the format below.

ABCD

A = Flux bin (J, K, L, M etc.)

B and C = Color bin (W0, U0, V0 etc.)

D = V_f bin (D, E, F, G etc.)

Luminous Flux Bins

Table 8 lists the standard photometric luminous flux bins for LUXEON Rebel emitters (tested and binned at 350 mA).

Although several bins are outlined, product availability in a particular bin varies by production run and by product performance. Not all bins are available in all colors.

Table 8.		
Flux Bins		
Bin Code	Minimum Photometric Flux (lm)	Maximum Photometric Flux (lm)
H	50	60
J	60	70
K	70	80
L	80	90
M	90	100
N	100	110
X	110	120
P	120	130
Y	130	140
Q	140	150
R	150	160
S	180	200

Cool-White Bin Structure

Figure 15. Cool-White bin structure.

Cool-White LUXEON Rebel emitters are tested and binned by x,y coordinates. 19 Color Bins, CCT Range 4,500K to 10,000K.

Table 9.

Forward Voltage Bins

Table 11 lists minimum and maximum V_f bin values per emitter. Although several bins are outlined, product availability in a particular bin varies by production run and by product performance.

Table 11.			
V_f Bins			
Bin Code		Minimum Forward Voltage (V)	Maximum Forward Voltage (V)
B		2.55	2.79
C		2.79	3.03
D		3.03	3.27
E		3.27	3.51
F		3.51	3.75
G		3.75	3.99

Company Information

Philips Lumileds is a leading provider of LEDs for everyday lighting applications. The company's records for light output, efficacy and thermal management are direct results of the ongoing commitment to advancing solid-state lighting technology and enabling lighting solutions that are more environmentally friendly, help reduce CO₂ emissions and reduce the need for power plant expansion. Philips Lumileds LUXEON® LEDs are enabling never before possible applications in outdoor lighting, shop lighting, home lighting, digital imaging, display and automotive lighting.

Philips Lumileds is a fully integrated supplier, producing core LED material in all three base colors, (Red, Green, Blue) and white. Philips Lumileds has R&D centers in San Jose, California and in the Netherlands, and production capabilities in San Jose, Singapore and Penang, Malaysia. Founded in 1999, Philips Lumileds is the high flux LED technology leader and is dedicated to bridging the gap between solid-state technology and the lighting world. More information about the company's LUXEON LED products and solid-state lighting technologies can be found at www.philipslumileds.com.
