**Cleaning:** Tape sealed versions are capable of withstanding washing processes using alcohol-based solvents only. Water or other water-based solvent washing processes are not recommended. Care should be taken to avoid flux adhering to the switch body from the circuit board soldering process. The switch should be allowed to cool for at least 3 minutes between the end of the solder process and the beginning of the wash process. The solvent stage of the cleaning process is not to exceed 1 minute and the whole wash process is not to exceed 3 minutes. Ultrasonic or pressure wash cleaning is not recommended.

## SPDT with Common

True Form C Switching

The diagram illustrates the operation of an SPDT switch with a common terminal in True Form C switching mode. It shows two states: a closed state (left) and an open state (right). In the closed state, the common terminal (C1) is connected to the normally closed terminal (C2). In the open state, the common terminal (C1) is connected to the normally open terminal (C2). The switch is shown in two views: a top view and a side view. The top view shows the common terminal (C1) connected to the normally closed terminal (C2) in the closed state and to the normally open terminal (C2) in the open state. The side view shows the common terminal (C1) connected to the normally closed terminal (C2) in the closed state and to the normally open terminal (C2) in the open state.

## OPTIONS

### Position Identification Line Option

#### For Series 76RSB, 76RSC, 76RSD, & 90B

A line can be added to the recessed rocker or Series 90 slide actuator to provide positive identification of the actuator position. To order, add L as a final suffix to the part number. For example, 76RSB08 becomes 76RSB08L; and, 90B08S becomes 90B08SL.

Available from a local Grayhill Distributor.

### Other Switch Markings

#### For Series 76, 78, & 90

We can mark your part number or other wording on the switch, often at no charge. For some markings there will be a nominal charge for tooling plus a set-up charge. In addition, there is a marking charge per side per switch. Add it to the unit price and discount it accordingly.

To order, contact Grayhill.
